RAMA SRI SURYA

Visakhapatnam / Kollam, India | +91 7396339936 | kramasrisurya@gmail.com
LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Aspiring AI/ML & Generative AI Engineer and Computer Science undergraduate with hands-on experience building autonomous agentic systems, Computer Vision pipelines, and production-grade LLM applications. Winner of 2 competitive hackathons with demonstrated proficiency in Python, PyTorch, FastAPI, and the Google Gemini API. Passionate about applying deep learning and agentic workflows to solve real-world problems.

EDUCATION

Amrita Vishwa Vidyapeetham — Kollam, Kerala, India *Expected Graduation: 2029*

Bachelor of Technology in Computer Science & Engineering

- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Linear Algebra, Probability & Statistics, Database Management Systems.
- **Academic Honors:** 2x University Hackathon Winner (Semester 1 & Semester 2).

TECHNICAL SKILLS

Programming Languages: Python (Proficient), TypeScript, JavaScript, Java, C, SQL
AI, ML & Deep Learning: PyTorch, TensorFlow, Keras, Scikit-learn, CNNs, Computer Vision, Person Re-Identification (ReID), Object Tracking
Generative AI & LLMs: Google Gemini API (@google/genai), Multi-Agent Systems, Deliberative Reasoning Workflows, Prompt Engineering, Structured JSON Outputs
Data Science & Visualization: Pandas, NumPy, SciPy, Matplotlib, Seaborn, Streamlit
Backend & Cloud: FastAPI, Uvicorn, Pydantic (v2), SQLAlchemy (AsyncIO), Express.js, Supabase, Redis, REST APIs
DevOps & Tooling: Git, GitHub CLI, Docker, Linux/Shell, Ruff, Pytest, Vite, Bun

FEATURED PROJECTS

SmartRetail_AI — Autonomous Spatial AI & Retail Risk Engine [Code] *Python, FastAPI, Redis, Docker, Pytest*

- Engineered a modular computer vision and spatial intelligence platform implementing person re-identification (ReID), real-time customer journey tracking, and hazard/loss prevention.
- Architected asynchronous REST services using FastAPI, Pydantic v2, and SQLAlchemy (AsyncIO), backed by Redis for sub-millisecond state caching.
- Enforced robust code quality standards with Ruff linting and comprehensive pytest unit and integration test suites.

Educraft.ai — Multimodal GenAI PDF-to-Course Conversion Engine [Code] *TypeScript, Google Gemini API, React 19, Supabase*

- Developed an end-to-end educational platform leveraging Google Gemini models to extract, structure, and convert complex PDF documents into interactive course modules.
- Built a responsive full-stack interface with React 19, Vite, Tailwind CSS v4, and Node/Express backend with @supabase/ssr authentication.
- Optimized multimodal LLM prompt chains with structured output schemas to reliably generate lessons, quizzes, and concept summaries.

S2 Deliberative Legal Agent / OmniBots — Multi-Agent Reasoning System [Code] *Python, GenAI, Agentic AI*

- Designed an autonomous multi-agent reasoning system capable of document analysis, legal deadline triage, and structured decision verification.
- Implemented deliberative multi-step reasoning patterns allowing agents to validate outputs against domain constraints prior to returning recommendations.
- Awarded 1st place in the Epochon 2.0 Hackathon for innovative autonomous multi-agent architecture.

MNIST Deep CNN & Interactive Canvas Dashboard [Code] *Python, Keras 3, PyTorch, Streamlit*

- Designed and trained a deep Convolutional Neural Network (CNN) achieving >98% accuracy on handwritten digit recognition.
- Deployed a web-based drawing interface using Streamlit and streamlit-drawable-canvas for real-time user digit inference and class probability visualizations.

Movie Recommendation Engine [Code] *Python, Scikit-learn, Pandas, Streamlit*

- Implemented content-based and collaborative filtering recommendation algorithms using TF-IDF vectorization and cosine similarity metrics.
- Developed an interactive discovery UI in Streamlit with data exploration charts using Matplotlib and Seaborn.

ACHIEVEMENTS & HACKATHONS

- **Hackathon Winner (1st Semester):** Secured 1st place in university-wide hackathon for innovative software architecture.
- **Hackathon Winner (2nd Semester / Epochon 2.0):** Won top honors for building the autonomous agentic reasoning system (OmniBots).

CERTIFICATIONS

- **AIML Certification Program** — IIT Patna
- **Computer Vision with Azure Cognitive Services** — Microsoft
- **Data Analytics Job Simulation** — Deloitte (Forage)
- **AWS Cloud Practitioner Essentials** — Amazon Web Services
- **AI & Generative AI For All** — Infosys Springboard
